

growing moments memory and birthday book

Product materials and construction

The soft brown growing moments is made from premium quality acid-free archival materials and constructed to last for generations. These unique features include;

Natural brown, embossed and fabric-lined polyurethane material used on the cover and liner provides a soft leather-like feel that will be remain for generations.

All seams and hinges are hand sewn together after being laminated to an acid-free substrate to insure structural integrity.

Clean .20 mm thick polypropylene photo and insert pockets are hand sew directly to an acid-free matte grey woven cloth backing, eliminating unsightly pocket wrinkling.

Insert pages are printed on both sides of an acid/lignin-free, 120 pound cover stock with radiused corners for easy removal and insertion into the protective pockets.

All packaging, instructions and insert pages are printed with soy-based ink.

The door hanger assembly and template are injection-molded from polypropylene material to maintain the quality of the living hinging and to insure accurate and consist measurements. All hardware is plated to prevent rust.

The growing Moments product is tested to international Test standards for photo album and scrapbooks. Bureau Veritas MC-5060-US.

Each growing Moments product number GSB1 measures 9" wide, 10" high , 1 1/4" in thickness and weighs 2 3/8 pounds. There are eight units per master carton which weighs 21 pounds.

The growing Moments product is supplied with the memory book, door hanger, mounting arm, thumb nut & screw, hanger studs, marking template and complete instructions for usage. All components packaged with a front side view window and with "how to use" photos and text on the back of the carton.
