

Why should I buy a growing moments memory and birthday book.

It provides a visual growth history from month to month, year to year and even child to child.

The average family moves 5 times in a life time, Growing Moments would allow you to take those past growing recordings and events with you.

Provides a keepsake for your child's children.

Provides a method to record birthday events, showing who was at the party, what the cake was what the presents were...

Take photos and scrap book your child's favorite toys, programs, friends, etc

A place for those school pictures that never seem to find a home. Store the pictures of your child, their classmates or friends along with their own.

The uniqueness of the folding of the GM allows you or others to follow the history of your child's growth and gives you a method and incentive to record events that might otherwise be lost.

You can even input photos and growth data into your computer and print directly on or paste on the insert cards.

Your hand writing is also something that will age with beauty and something your children will cherish.

When I look back to my growing years, having an event, a picture or some other form of memorabilia makes that event more real or colorful and provides a link to even more memories.

It is a gift who's owner will always remember who gave them the gift.

Grandparents can watch grandchildren grow even if they are many miles away.

Have the special place to record memories in pictures and words.

All the materials use in the manufacture of the Growing Moments are designed to last for generations, meaning your child's children's children.
